EXPERIMENTAL 30 AMP (12/14V) STANDBY ALTERNATOR

SKU(s)# FS1-14

Description: 13.6 volt, 30 amp standby alternator. This alternator will automatically assume the aircraft load in the event of the failure of the primary alternator. It mounts on an unused AND 20000 pad (vacuum pad) on both Lycoming and Continental engines.

Warranty: 2-Year **Limited**

Weight: 6 Pounds

Price: See [Dealers](#) for pricing

*This alternator is identical in appearance to the FS1-14B, which is used as a primary alternator. Note the difference in voltages and usage.
