GemWater Travel

Vitalising water wherever you are: GemWater Travel supplies you with activated water when you travel.

Cost: £466 including postage. To order please [click HERE](#)

GemWater Travel is placed near the tap – and the valuable information is transferred to the water instantly.

At the core of this activator is an orgone energy beamer working with specific wave lengths, frequencies and information, which effects targeted reactions in the subtle and material range of the activated water. The quartz sand used has been processed by means of the laser-enhancing technology developed by Dr. Todd Ovokaitys.

GemWater Travel

Principles, advantages and applications of GemWater Travel:

- Mobile use, no installation required
- Beneficial for those who travel or move between homes
- GemTravel can be pointed at your body for healing
- It can be placed in your bathtub to activate the bath water
- It can be pointed at food and water jugs
- Water activation from the outside by means of a physical and energetic process
- Can be used effectively even close to electrical appliances or geopathic stress areas
- For wells, cisterns and water tanks up to 30 m³ of liquid per activator for the potential reduction of harmful bacteria and germs
- Just like tap water, bottled mineral water and drinks can also be activated

GeWater Impulse

The GemWater Impulse is an attachment activator for home installation under your kitchen sink. It is attached to the water pipe by means of a bracket.

Cost is £588 including postage. To order please [click HERE](#)

The core is once more an orgone energy beamer. This is built identically to the GemWater Travel device, but, in addition, is embedded in rock crystals which are surrounded by quartz sand. These precious and high energy materials are enclosed in a copper encasement built to harmonic measures. The quartz sand has been processed using the laser-enhancing technology developed by Dr. Todd Ovokaitys.

Principles, advantages and applications of GemWater Impulse

Fits to the outside of the pipe.

Can be used for the water supply of apartments and detached properties with a pipe diameter of up to ¾ inch (20 mm metric size).

For industrial plants working with water as a coolant, solvent and means of transport.

For agriculture and waste water treatment plants.

Simple fitting by means of a bracket, therefore no installation costs.

Water activation by means of a physical and energetic process.

Can be used effectively even when near electrical appliances or geopathic stress areas.

No water flows through the GemWater Impulse. The energy suppliers inside the activator transfer their power through the pipe to the water inside.

GemWater Boost

the water supply to an entire house/apartment including bath and shower water. It differs from the GemWater Impulse which is ideal just for application to a pipe under a single sink which provides drinking and cooking water. GemBoost provides increased performance created by the addition of two turbo-loaders housing phials with healing water and pure oxygen. This further enhances the orgone energy beamer component of the activator. The energetically active components are embedded in rock crystals combined with quartz sand. The encasement box is made of stainless steel to harmonic measurements.

The quartz sand used in this activator has also been processed by the laser-enhancing technology developed by Dr. Todd Ovokaitys.

Principles, advantages and applications of GemWater Boost

- Self-assembly: directly mounted onto the pipe by means of a clamp
- Useful for activating water for an entire house or apartment
- Can be used for the water supply of large detached properties with a pipe diameter from 1 inch up to 1¼ inch (25 - 32 mm metric size)
- For industrial plants working with water as a coolant, solvent and means of transport
- For agriculture and watering systems
- For the water supply to swimming pools and baths
- Water activation from the outside by means of a physical and energetic process
- Can be used effectively even when near electrical appliances or geopathic stress areas

No water flows through the GemWater Boost. The energy suppliers inside the activator transfer their power through the pipe to the water inside.
